

COMM2501 T3 2020 A3 Submission

zID and name: z5255399 (Alexander Lau)

Theme of your Visualisation Portfolio Blog: Air Pollution Trends in the USA (2000-2015)

Audience: Extract from *About* page:

The visualisations aim to aid in driving decision making at a government level, providing insights that compares to that of the Environmental Protection Agency (EPA).

But the visualisations also serve another purpose, by giving us the opportunity to inform American citizens about air polluting activities. Our aim is to inspire action, given a better awareness of air pollutants and their dangers.
